'Your partner in pre-packed garden accessories'

For over 25 years customers rely on high quality nets by Howitec Netting. We offer a wide range of sustainable products in various meshes, colours and dimensions. From anti-bird nets to plant protection nets and from garden essentials to screening, all our nets are made from virgin UV-stabilized polyethylene in tape (flat yarn) or in monofilament versions all up to the highest standards and quality.

Our nets are used for the effective protection of fruit trees, vegetables and ponds against birds, wild animals and/or leaves, sun, wind and insects.

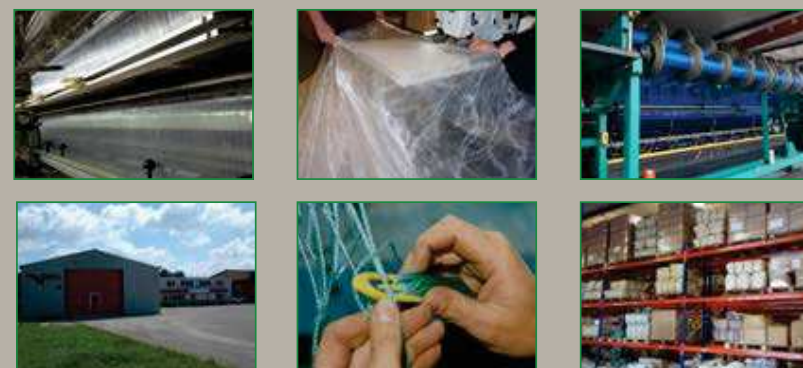

Howitec Netting is the specialist in pre-packed gardening articles for garden centers, department stores and hardware stores.

By providing you with your own 'private label' range we help you to create the added value that differentiates you from your competitors. We can also create a custom-made range of products where we take care of the whole process, from idea to product. Saving you time and money!

However, when a private label range is not desired, we supply our various products in a neutral net packaging or foil packaging.

Our customers benefit from our extensive product range which is stocked and distributed from our own warehouse in Bolsward - the Netherlands. This enables us to provide quick and efficient service with just-in-time delivery at pre-arranged times for a competitive price.

For more extensive information and technical brochures in 4 different languages, samples, prices, delivery times or other specific questions, do not hesitate to contact us.
